

Greg Amer V. Arsua

Senior Full-Stack Developer

Poblacion, Oslob, Cebu, Philippines | +63 945 614 7055 | arsuagreg30@gmail.com | Open to Remote and Onsite Opportunities

PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 6+ years of experience designing, building, and deploying production SaaS platforms, real-time booking systems, and AI-integrated dashboards for enterprise clients. Led a team of 5 developers at a Japanese-owned offshore software company, owning projects end-to-end from system architecture and API design through AWS cloud deployment. Reduced system latency by up to 80% and improved Google PageSpeed scores by up to 80% across multiple production sites. Skilled across React, Next.js, TypeScript, Laravel, Node.js, and AWS, with strong experience in REST API design, database optimization, and cross-functional, cross-cultural client collaboration.

CORE COMPETENCIES

React, Next.js, JavaScript, TypeScript, Redux, Tailwind CSS, SCSS, Material UI, Laravel, PHP, Node.js, REST API Design, JWT, OAuth 2.0, MySQL, PostgreSQL, Database Indexing and Query Optimization, AWS (EC2, S3, RDS), Nginx, Linux, Git, CI/CD, Jest (Unit and Integration Testing), Agile/Scrum, System Architecture, Microservices, WordPress, Shopify, Flutter, Mobile App Development, AI-Integrated Dashboards, Google PageSpeed Optimization, Cross-Functional Team Leadership

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer | HIPE Japan Inc. | Cebu City, Philippines

November 2019 - Present (6+ years)

Japanese-owned offshore software development company (80+ engineers, 40+ Japanese corporate clients) providing dedicated engineering teams across Cebu and Manila. Led a team of 5 developers. Projects under NDA; references and work samples available upon request.

- Architected and delivered full-stack SaaS platforms using React, Next.js, Laravel, and Flutter, supporting multi-tenant architectures for simultaneous Japanese corporate client deployments.
- Led and mentored a team of 5 developers, managing sprint planning, code reviews, and technical decision-making from architecture through deployment.
- Engineered RESTful APIs powering web dashboards and iOS/Android mobile apps, secured with JWT and OAuth 2.0, supporting production-scale traffic for enterprise clients.
- Built a real-time transport booking platform with live GPS driver tracking as a flagship product for a Japanese client, improving dispatch visibility and user satisfaction.
- Drove 50-80% application performance improvements through MySQL/PostgreSQL query optimization, server-side caching, and frontend bundle refactoring.
- Reduced database query latency significantly through composite indexing, query plan analysis, and schema normalization across high-traffic production databases.
- Owned AWS infrastructure end-to-end, including provisioning EC2 instances, configuring RDS and S3, managing SSL certificates and Nginx reverse proxies, and implementing horizontal scaling for production environments.
- Delivered up to 80% improvement in Google PageSpeed scores across multiple client websites through code splitting, lazy loading, image optimization, and critical CSS inlining.
- Developed custom WordPress and Shopify solutions, including bespoke themes, extended plugin functionality, and third-party API integrations for e-commerce and business clients.
- Integrated AI-powered reporting dashboards that automated data analysis workflows, reducing manual reporting effort for client management teams.
- Collaborated daily with Japanese clients and cross-functional teams in an international offshore environment, consistently meeting delivery timelines and quality standards.

Graphic Designer and Visual Artist | Metropolitan Printing Base | Talisay City, Cebu

June 2018 - September 2019

- Produced print and digital design assets, including layouts, branding materials, and marketing collateral, managing concurrent client deadlines across multiple active projects.
- Strengthened visual communication and client-facing skills that directly support UI/UX sensibility in current full-stack development work.

EDUCATION

Bachelor of Science in Information and Communications Technology

Cebu Technology University | Cebu City, Philippines

Graduated: May 2019
