Portfolio: https://gregarsua.github.io/portfolio/

To work in an environment that offers opportunities in the field of software and web development.
I am eager to expand my skills through hands-on experience across various aspects of software and web development.

Work Experience

NOVEMBER 2019 – PRESENT
Software Developer| HIPE JAPAN INC. | Cebu City

- Led a team for developing full stack web applications using (React, NextJS, Flutter, Laravel)
- Designed and implemented RESTful API architecture using Laravel for SaaS platforms, dashboards, and multi-tenant systems
- Developed full-stack applications using React.js and Next.js, building reusable components and feature-based architectures
- Integrated authentication systems using JWT and OAuth for secure user access
- Contributed to a **transport booking mobile application (1,000+ users)** by implementing real-time driver tracking using Google Maps integration, improving user visibility and experience
- Developed and supported dashboard systems connected to mobile applications, enabling booking management and operational monitoring
- Improved application performance through query optimization, caching strategies, and frontend code refactoring, resulting in faster load times and better user experience
- Optimized database queries using joins and indexing, and managed schema updates through Laravel migrations
- Deployed and maintained applications on AWS (EC2, S3, RDS), including server setup, Nginx configuration, and domain/SSL setup

Web Development Projects (WordPress, React, Next.js, Shopify)

- Developed and deployed custom WordPress websites for Japanese clients, including restaurant and booking-focused platforms, ensuring responsive design and optimized user experience across devices
- Built custom WordPress themes from scratch and extended existing plugins by modifying PHP logic to support specific client requirements such as booking workflows and content management enhancements
- Integrated third-party services and APIs (e.g., booking systems, forms, analytics tools) to enhance website functionality and user interaction
- Improved overall score for page speed insight by up to 80%
- Collaborated with designers and stakeholders to translate business requirements into functional and visually consistent web interfaces
- Developed and maintained multiple web applications across different stacks (Laravel, Next.js, Shopify), adapting quickly to project requirements and timelines
- Contributed to building AI-integrated dashboards that process and analyze end-user responses, helping clients gain insights from collected data

JUNE 2018 – SEPTEMBER 2019

Graphic Designer/Artist | Metropolitan Printing Base | Talisay City, Cebu

- Created visual designs using Adobe Photoshop and Illustrator for print and digital media
- Delivered high-quality layouts while managing multiple projects and deadlines

Skills

Languages & Frameworks:

- PHP (Laravel), JavaScript, TypeScript, React.js, Next.js, HTML, CSS, SCSS

Tools & Technologies:

- MySQL, PostgreSQL, AWS (EC2, S3, RDS), Nginx, Git

Frontend:

- Redux, Context API, Material UI, Tailwind CSS

Other:

- WordPress (custom themes), Flutter, REST APIs, OAuth, JWT

Education

MAY 2019

Bachelor of Science in Information and Communications Technology | Cebu Technology University | Cebu City

Additional Information

- Familiar with Jest for frontend testing
- Experience working with feature-based component architecture
- Strong background in debugging and performance optimization
